

## **A Journey of the Program | The Big Picture | Compiler, Linker, Assembler, and Loader**

Please Watch it here –[The Journey of a Program | The Big Picture | Compiler, Linker, Assembler, and Loader.](#)

- **Compiler converts human-readable code into a computer-understandable language.**
- **Assembler readies program elements for computer use.**
- **Linker merges various program components into a unified package.**
- **Loader loads the program into memory, enabling interaction.**

**This is called CALL**
